

## Protective Packaging

### Bubble

A lightweight, cost-effective way to protect products during handling and transit. Its air-filled bubbles absorb shock and vibration, helping reduce damage from minor impacts while keeping shipping weight and costs low. Bubble wrap is flexible and easy to use.

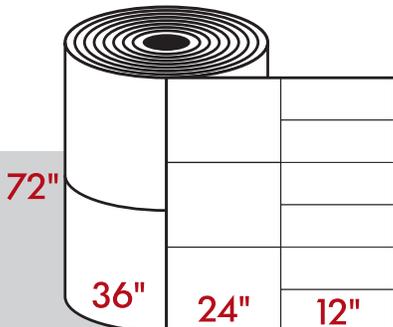

Bubble	Width	Length	Application
3/16"	48"	750'	Light Weight Products
5/16"	48"	375'	Medium Weight Products
1/2"	48"	250'	Heavy Weight Products

### Foam

Provides consistent, reliable cushioning that absorbs impact without collapsing under weight. Foam distributes pressure evenly across the surface of a product, making it especially effective at protecting edges, corners, and finished surfaces from damage during handling, stacking, and transit.

Foam Thickness	Available Widths	Length
1/32"	48" / 60" / 72"	2000'
1/16"	48" / 60" / 72"	1250'
3/32"	48" / 60" / 72"	750'
1/8"	48" / 60" / 72"	550'
3/16"	48" / 60" / 72"	350'
1/4"	48" / 60" / 72"	250'
1/2"	48" only	125'

All master rolls can be slit and/or perforated to customer specifications, providing the right size for faster packing and reduced waste.

*Additional charges may apply for slitting and perforation.*
